EDUCATION

Greater Noida Institute of Technology (GNIT)

B.Tech in Computer Science and Engineering (CGPA: 8.2)

Greater Noida, India

Graduated: June 2024

EXPERIENCE

Keywords Studios

Technical Research Engineer - AI (Promoted)

Gurugram, India

November 2025 - Present

- Product-managed a 10-member AI data operations squad to ship 10,000+ structured prompt variations; optimized training velocity by 56% and improved core LLM output accuracy.
- Established rigorous QA protocols and data audit cycles, reducing dataset error rates by 40% and ensuring 98% data accuracy for downstream model validation.
- Managed cross-functional stakeholder alignment (Research, QA, Product) to establish standardized acceptance criteria and edge-case handling for complex LLM features.
- Designed the validation framework for structured JSON training datasets, accelerating downstream model deployment cycles.

Keywords Studios

Research Engineer - AI

Gurugram, India

April 2025 - November 2025

- Analyzed and curated a dataset of 3,000+ samples, performing data validation and error-pattern analysis to improve model reliability.
- Improved output reliability by 20-25% through systematic error identification and feedback.
- Maintained 98% data accuracy via rigorous quality assurance protocols.

Founders Office

Digital Product Consultant Intern

Remote, India

October 2024 - January 2025

- Conducted 100+ market and product research assessments, successfully validating 5+ high-priority digital product ideas and defining early feature road-maps.
- Formulated cross-functional feasibility and capacity planning models, reducing engineering requirement definition time by 43% for new product proposals.

PROJECTS

Customer Satisfaction Dashboard | Python, SQL, Tableau/Power BI

September 2023

- Built a Customer Satisfaction Dashboard (SQL & Tableau) tracking key product health metrics (NPS, Funnel Conversion); identified a 15% user drop-off in the onboarding funnel, resulting in 3 UI/UX recommendations adopted by the design team to improve activation rates.
- GitHub: [Customer-Satisfaction-Analysis](#)

Coffee Shop Sales Dashboard | Power BI, Data Cleaning

December 2023

- Built a Power BI dashboard to analyze sales, average bill value, product performance, and customer purchasing patterns.
- Applied data cleaning and preprocessing steps that improved visualization accuracy and consistency by 10%.
- Identified sales patterns associated with a 15% revenue increase over the last 3 months.
- GitHub: [Coffee-Shop-Sales](#)

SKILLS & CERTIFICATIONS

Product Strategy: User Discovery, MVP Definition, Product Roadmapping, Wireframing (Figma), Agile/Scrum, PRDs, Market Research

AI & Technical Productization: Prompt Engineering, LLM Evaluation, Requirement Gathering, RAG Frameworks, JSON, Python

Analytics & BI: MS Excel, SQL, Power BI, Funnel Analysis, KPI Tracking, Statistical Analysis, Google Analytics.

Certifications: CAPM Certification Course, Career Essentials in Business Analysis.
